

Exercise 1: table - columns overview

 ex01_overview.txt in the metacode project map

execute the code generation after each step and watch the result in the destination project

In this exercise we create an overview of the tables with all their columns.

add the repeattables metatag as start and end tag.

This part will be repeated for each table.

```
:repeattables:
...
:repeattables:
```

add the Table tag. Note that Table has a first character in upper case.

The tables will be listed

```
Table :Table:
```

add the repeatfields pseudotag as start and end tag, inside the repeattables tags.

This part will be repeated for each column inside a table.

```
:repeatallfields:
...
:repeatallfields:
```

inside the repeatallfields tags we add the columntype and column

```
:columntype: :column:
```

The complete template

```
Overview of all tables and fields
:repeattables:

Table :Table:
:repeatallfields:
:columntype: :column:
:repeatallfields:
:repeattables:
```
