Exercise 3: table keys

In this exercise we create an overview of the table keys, with a file for each table

add table name

```
Table :Table:
```

add primary key

```
Primary key
:repeatpkfields:
:columntype: :column:
:repeatpkfields:
```

add foreign keys

```
:repeatforeignkeys:
Foreign key: :uniquename:
:repeatforeignkeyfields:
:columntype: :column:
:repeatforeignkeyfields:
:repeatforeignkeys:
```

add remaining fields, not part of primary key or a foreign key

```
Fields not part of a key
:repeatfields:
:columntype: :column:
:repeatfields:
```

The complete template

```
Table :Table:

Primary key
:repeatpkfields:
:columntype: :column:
:repeatpkfields:

:repeatforeignkeys:
Foreign key: :uniquename:
:repeatforeignkeyfields:
:columntype: :column:
:repeatforeignkeyfields:
:repeatforeignkeys:

Fields not part of a key
:repeatfields:
:columntype: :column:
:repeatfields:
```
